

# Pacific King <sup>F1</sup>

**Maturity:**

Early maturing storage pumpkin for use in both the early and storage markets. Matures 7-14 days earlier than other early-main season varieties.

**Yield and Storage:**

Excellent yields—10% plus over competitors. Storage ability has been exceptional.

**Fruit:**

Smooth grey skin with good uniformity. Deep - high shape. Excellent internal & external colour for early harvest. Early flower is significantly enhanced over other varieties. 3 - 4.5 kg weight. Consistently small blossom scar and seed cavity.

**Plant:**

Semi-bush habit. A strong growing plant with a vigorous vine. Sets fruit approximately 30-40cm away from centre of plant, reducing vine marking and rubbing normally associated with a true bush type.

**Disease Resistances:**

IR to Px

**Disease key:**

Px - Powdery mildew (*Podosphaera xanthii*)
