

INCA^{F1}

MEL 1468 Trial Code

Fruit:

Weight 1.6-2.kg with a medium small cavity. Fruit is blocky-oval in shape with sutures and a mild ropey net. Flesh has a great **melon flavour**, firm with excellent colour, brix of 12-14°. Great aroma too.

Harvest Season:

Good setting mid maturing variety. Fruit slip, but it is better to pick earlier at the sugar cracking stage on the stem attachment.

Characteristics:

Sutured melon with a mild ropey net and medium small cavity. Yields well with good fruit numbers, shipping and storage ability. Plant has good canopy cover and a strong vine. **ESL - Extended Shelf Life**

Disease Resistances:

HR to Gc 1,2, Fom

Disease key:

Gc – Powdery mildew (*Podosphaera xanthii*)

Fom - Fusarium wilt (*Fusarium oxysporum* f.)
