

Floraision ^{F1}

Plant:

Semi erect plant habit with no curd cover.

Sprouting head:

Floraision has small white sprouts/florets which are open to daylight and will discolour slightly over time.

Harvest Season:

Late Spring to Winter harvest.

Characteristics:

The whole sprouting head weighs 0.9-1.2kg. This can be broken into small bunched florets as indicated in the photo on the left.

Maturity:

Timing in maturity is late Spring and into Winter. This is a 12-14 weeks (80-85 Day) maturing cauliflower from transplant depending on the season and location.
