

# Robusta F1

### Plant:

A medium-strong vigorous plant. **Robusta** has shown very good tolerance to bolting.

### Head:

Drumhead shape. Good density with a small core. Heads are well filled and heavy. Can be used as a processing variety when required. When left, **Robusta** will continue to fill getting up to a head weight of 4.5-5kg.

### Characteristics:

A Winter-late Spring harvest type. **Robusta** has strong heavy and dense leaves. Medium dark in colour with good wrapper leaves.

### Harvest Maturity:

90 -150 days from transplant, depending on location. (including holding in spring)

Upper North: 90 — 150 days (holding 20-30 days)

Lower North: 90 — 140 days

South Island: 90 — 150 days (still in trial)

### Harvest Season:

Suits a harvest season mid June through to mid December.

We recommend this as the best production slot.

It may run longer if required.
