

Zucchini

Armour F1

Plant:

A strong growing plant with a vigorous vine. Good fruit setting ability. Compact internodes

Habit:

A reasonably open plant, erect and easy to pick. Similar habit to Ballistic.

Fruit:

Armour fruit are straight and medium to dark green in colour. They grow to their length and then begin to swell evenly along the fruit. Armour has a "small" blossom end scar. Slightly longer fruit than Ballistic. High yielding variety with good shipping and storage ability.

Harvest Season:

Armour is used for early season sowing starting June in Northland, and main season throughout NZ to the end of harvest in May-June. Can be grown undercover early and late.

Disease Resistances:

HR to Px

Disease Key:

Px - Powdery mildew (Podosphaera xanthii)
